#### **2. BOREHOLES**

No boreholes funded during this period.

#### **3. FILTERS**

All of the 7 tanks above were given two filters (totaling 14) and an additional 18 filters were sold.

In addition to distribution, phone calls were made several sites to verify that filtration systems were functioning properly and to troubleshoot any difficulties recipients might be experiencing with the filters.

### **PEOPLE SERVED**

3,650 people are now able to get water from the 7 tanks installed.

During this period we have received 2 applications from churches and 6 applications from schools.

## **FOLLOW-UP SURVEYS**

The follow-up on the sites below was carried out using BASELINE or an IMPACT survey and we captured information of how tanks are operating now generally.

## **RECOMMENDATIONS AND CONCLUSION**

**A- Filter tracking-** despite efforts to track distribution of Sawyer PointONE filters, we still find there is a gap in reporting. Our staff will continue to look for creative ways to improve our record keeping of filtration distribution.

### **B- Follow Up Surveys-**

**a.)** With our newly implemented surveys, all sites as of September 1st have had a baseline survey conducted.

**b.)** Office staff will create a Follow Up Survey tracking system that will help the organization to assess any maintenance that existing sites are in need of, as well assisting staff in scheduling more regular visits to projects.
