

2018 IMPACT REPORT

Thanks to you, last year was one for the books. With an unprecedented number of major water projects funded by the Ugandan Water Project's Tribe, we were able to bring clean, safe drinking water to tens of thousands of people in communities across Uganda! We're excited to share these victories with you and to celebrate the transformation that only clean water can bring.

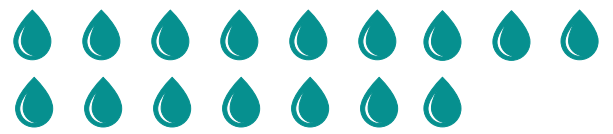

38,588

men, women, and children received access to clean water in 2018 because of you

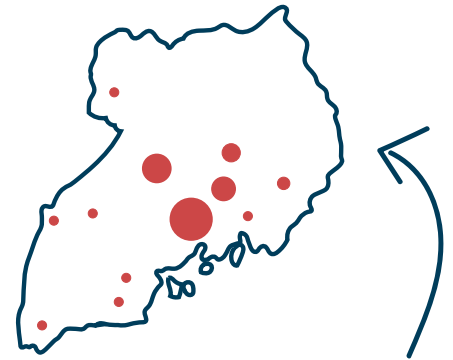

220,770

people in Uganda have received clean water through UWP since 2008

16 million

liters of clean water are being consumed annually through the projects you enabled us to install in 2018. That's the same amount of water found in SIX Olympic swimming pools.

54

schools received projects

13

health facilities served

65

communities impacted

56

 rainwater collection systems funded

40

 borehole well repairs funded

3

 new borehole wells funded

1

 gravity fed system funded

678,900

hours spent fetching water saved annually through all projects installed in 2018

100

 major projects funded in 2018

394,200

hours of classroom time redeemed by projects installed at schools in 2018

509,175

fewer miles walked annually due to all projects installed in 2018

459

Sawyer Point One water filters distributed in 2018
